

Features and Benefits

Stand Alone Operation

The DVC-1000 is a complete videoconferencing solution that is so easy to use we call it a **VideoPhone**. There's no waiting for a PC to boot up to determine whether you have a call and no navigating complex software. You can communicate when you want, the way you want and without having to be a computer expert.

DVC-1000 Fast Ethernet Broadband VideoPhone

High Quality Broadband Videoconferencing

From your broadband Cable modem, DSL or Ethernet connection to the Internet, the DVC-1000 uses the power and connectivity of the Internet to communicate. By using a broadband connection you get high-quality video and audio without the quality limitations of dial-up Video Phones.

Other D-Link products that work with the DVC-1000:

DI-604
4-Port Broadband Router

Streaming Video at up to 30 Frames Per Second

High video speed and quality are possible with the DVC-1000. Using the H.323 video compression standard the DVC-1000 can display video in real-time. This lets your friends, family and colleagues see and hear you in real-time, anytime.

DCM-200
High Speed USB Ethernet Modem

Easy Configuration Setup Wizard

You set up the DVC-1000 from the intuitive, easy to use Setup Wizard. You are guided every step of the way through a few short setup screens and before you know it, your making and accepting VideoPhone calls!

Remote Control Included

The DVC-1000 comes with a full-function intelligent remote control so you can use your VideoPhone in the same convenient way you watch television. In fact, you even enter information from the remote control using an on-screen keyboard.

DWL-810
2.4GHz Ethernet-to-Wireless Bridge

Audio/Video Privacy Protection with Built-in Caller ID

Know who's calling before you answer the DVC-1000 VideoPhone with the built-in Caller ID. You can turn off the video or audio and even activate the Do Not Disturb mode. You control the privacy features of the DVC-1000.
