D-Link®
Building Networks for People

Features and Benefits

Two Hi-Speed USB 2.0 Ports

Connect even more USB peripherals to your laptop such as hard drives, scanners, printers, digital camcorders and other USB peripherals. The DUB-C2 features two USB 2.0 ports, giving you enough extra room to connect additional USB peripherals.

Up to 480Mbps[1] Transfer Speeds

The DUB-C2 is Hi-Speed USB 2.0 certified providing up to 480Mbps[1] transfer speeds for fast transfer of digital content to and from your laptop and external storage, cameras, and other peripherals. At 40 times faster than the speed of USB 1.1, the DUB-C2 enables faster print processing with USB 2.0 printers and faster page scanning using USB 2.0 scanners.

Backward Compatible with USB 1.1 Devices

The DUB-C2 is backward compatible with all of your existing USB 1.0 and USB 1.1 peripherals. This means that you don't have to replace the USB 1.x products that you already have. Simply connect both your USB 2.0 and USB 1.x products to the DUB-C2, and each device will perform at its fastest speed automatically.

Compatible with Both Microsoft® Windows® and Macintosh™ OS X

With built-in support for USB 2.0 in Microsoft® Windows® and Macintosh™ OS X, the DUB-C2 is compatible with the most popular operating systems for easy integration into any existing platform or environment.

[1] Maximum transfer rate based on USB 2.0 specifications. Actual data throughput will vary.
